

Tanmay Jadhav

Computer Science Undergraduate — Software Engineer & Full-Stack Developer

📍 Pune, India 📞 +91 7620864209 ✉ jadhavtanmay199@gmail.com [🔗](#)
🐙 github.com/jadhav045 🌐 [Portfolio](#)

Professional Summary

Motivated Computer Science undergraduate specializing in **full-stack web development** and software engineering. Seeking a challenging Software Development Engineer (SDE) role to leverage proficiency in the **MERN Stack**, **Java**, and **Python**. Possesses a strong foundation in **Data Structures and Algorithms (DSA)**, Object-Oriented Programming (OOP), and system design. Experienced in building and optimizing scalable web applications and a published academic researcher with a passion for high-performance systems.

Technical Skills

- **Languages:** Java, Python, JavaScript, SQL
- **Web Technologies:** React.js, Node.js, Express.js, HTML5, CSS3, RESTful APIs
- **Databases:** MongoDB, MySQL
- **Core CS Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks

Experience

Academic Researcher & Developer – Club Connects

Jan 2025 – Jun 2025

- Authored a research paper for ICRAE 2025, proposing a model projected to **boost student engagement by 30%**.
- Constructed an end-to-end solution using the **MERN stack**, focusing on a robust backend infrastructure and efficient data modeling.
- Introduced live functionalities, including notifications and chat, by incorporating **Socket.IO**.
- Streamlined API efficiency and minimized response times by refining MongoDB queries and backend logic.

Projects

AI Web Platform – Full-Stack Application

Tech Stack: React.js, Node.js, Express.js, Google Gemini API, Hugging Face API

- Created an intelligent web application for text generation and summarization by utilizing Google Gemini and Hugging Face APIs.
- Architected an asynchronous user interface by refining state handling in React, ensuring a seamless and adaptive user interaction.

Personal Expense Tracker – Full-Stack Web App

Tech Stack: Node.js, Express.js, MySQL, Bootstrap, Chart.js

- Built a protected online tool for expense management, featuring identity verification and authorization from scratch.
- Modeled a relational data structure with MySQL and produced a suite of REST-compliant endpoints for CRUD operations.
- Embedded Chart.js to create interactive data visualization panels and provide spending insights.

DailyVault – Privacy-Focused Diary & Task Manager

Tech Stack: JavaScript, Node.js, Express.js, Web Crypto API

- Conceptualized a confidential digital utility with a zero-knowledge security model using **AES-GCM & PBKDF2**.
- Executed browser-based cryptography to ensure sensitive information remains completely private from the server.
- Assembled organizational tools including categories, priorities, and filters for an enhanced user journey.

Education

- **B.Tech in Computer Science Engineering**, Vishwakarma Institute of Information Technology, Pune
CGPA: 8.24/10 2022- 2026
- **HSC**, Shri Tilok Jain Vidyalaya, Pathardi 2022

Extracurricular Activities

- **Runner-Up, Sci-Tech Competition** - Secured 2nd place among 50+ participants by developing an interactive Python game using the Turtle library, showcasing programming and logical problem-solving skills.
- **Active Member, Industry Institute Interaction Council (I2IC)** - Coordinated technical workshops and seminars on AI/ML, Data Analytics with Python, and Full-Stack Web Development using the MERN Stack.

Certifications

- **AWS Cloud Practitioner** – Amazon Web Services Apr 2025
- **CCNAv7: Introduction to Networks** – Cisco Nov 2024
- **Programming in Java** – Infosys Springboard Nov 2023
